	Boiler for solid fuel package	80
	Air conditioning package	80
	Fencing projects	140
	Septic tanks sealed package	bezpł.

Jurassic house plan is a proposal for a family of four to five people. Single family bungalow with an attic of a simple block that combines elements of tradition - the gabled roof, and modernity - modern detail, materials and layout of the interior. Jurassic house has no small surface, it is designed for a comfort or even luxury, future users. At the same time compact oblong block will allow for building on a narrow plot, so often encountered. Interesting layout of windows on the facades, and adapted to them belt division into different finishing materials of walls, give the building a unique character. The interior of the house is divided into a living area on the ground floor, together with technical rooms grouped between the garage and the kitchen, and part of the night in the attic with master apartment and children's bedrooms. On the first floor near the entrance an extra room was designed, which could serve as a bedroom, office, or an office. The entire home life takes place in a combined space area of the living room, a kitchen and hall, and of the terrace - thanks to the large glazing in the garden facade. Jurassic house plan is the perfect choice for a fairly wealthy client who wants to have a modern and comfortable house, but do not want or cannot build a house with a flat roof. There is also available a mirror - version of Jurassic villa.
