Modern house plan was design for investors who appreciate contemporary architecture and design solutions. Modern house was design for clients who appreciate simple, elegant solution. Rectangular ground floor plan has been covered by symmetrical gable roof over the attic. The location of windows, façade cladding elements - all these elements were composed so as to add a house some dynamics. As a result, simple means, obtained a very attractive appearance. The interior of the house also refers to this style: bright, clear divisions inside also forms a very interesting interior. Single-space of living and dining room with kitchen, connected with hall separated by stairs to the attic. Glazed surfaces opening the interior to the garden the location of the fireplace - all adds the originality of the interior. On the ground floor there are office and a garage with a boiler room. In the attic there are : master bedroom with dressing room and bathroom, and the children's bedrooms with private bathrooms. Modern house, despite the original architectural details have the traditional form of the building with gable roof - it will result an easy and inexpensive construction, and the lack of problems with acceptance by the office issuing the building permit.
