	Fencing projects	140
	Septic tanks sealed package	bezpł.

Amethyst 2 house plan is a semi-detached house for the family of 4 to 6 people. This storey house was covered by the hipped roof. This house plan is a compact, easy to build body of the building, composed of the two two-storey halves connected by the one-story garages connector, has been also varied by wall fragments with the rustication, and two arcades. The subtle decorative elements add the Amethyst 2 some discrete elegance. The interior was designed with the clarity divisions - no needless space. All rooms have a functional shape. On the ground floor living room with dining room and lobby, with a partially open kitchen was planned. There is also an extra room - study or guest bedroom. In the usable part of the house there is also double garage and utility room - you can also opt out of the garage and in its place design a large utility room. On the first floor there are three bedrooms with dressing-room and built-in wardrobes and a large bathroom. It is also a possible to save up additional fourth room on the first floor - by eliminating wardrobe. There is also a mirror version of Amethyst 2.
