	Water jacket package	70
	Boiler for solid fuel package	80
	Air conditioning package	80
	Fencing projects	140
	Septic tanks sealed package	bezpł.

Party house is the prototype of which is bigger Gala. The project is designed for a family of four to five people. The building was designed as a one-storey villa with, covered by a gable roof. A simple block was complemented by partially protruding garage with a flat roof and roofed garden terrace. Modern architecture combines the simplicity of shapes and surfaces forming facades with nuanced detail, interesting colors and high quality materials. When designing the house we focused on simplicity and quality of the architecture. The interior of the house was divided into living and usable part on the ground floor and bedrooms in the attic. The combined living and kitchen hall form one open daily space. The interior decoration are nicely displayed from the entrance stairs. On the ground floor there is an extra room - a bedroom or office double garage and boiler room. In the attic there are three bedrooms: two children with built-in wardrobes and a shared bathroom and a comfortable parents' bedroom with a separate bathroom and dressing room. Party has everything you expect from a a single family house. This is a modern energy-saving easy and affordable to build and a later maintain and the interior is functional and spacious. There is also available a mirror version of this house plan.
