Four corners 3 is a charming house, which is a variant version of the project Four corners. This time the house plan has two cars garage and attic that could be adapted into a usable attic. The roof of the building was designed as a classic roof trusses rafter. Angles of roof was raised so that on the attic successfully accommodate even three rooms. At the same time the architect do not quite from bedrooms on the ground floor so that you can realize the construction by stages. The investor can life at house with a finished ground floor and adapt the attic if necessary. Thanks to the such interior layout Four corners 3, may also be three rooms house, bedrooms on the ground floor can be designed for seniors.
