	Septic tanks sealed package	bezpł.

Frog 2 house plan is a one storey detached house for a family of 3-5 people, with a usable attic. Frog 2 is a variant version of the Frog house plan, with the adapt attic above the ground floor. Thanks to the compact block, simple design and adapted attic, the house is very economical. The ratio of obtained usable area of the house, to the cost of construction is attractive in comparison to similar projects. Simultaneously the simplicity and compact of body goes together with the simplicity of construction of the house, and inexpensive cost of implementation. Frog 2 is a nice and stylish house that looks very impressive. Entrance to the house is underlined by roofing on the small columns. On the back, the garden elevation is decorated with arcades and a terrace. Traditional architectural form combines with modern materials and details. The whole creates an attractive appearance of the building. The interior of the house comprises on the ground floor daily area with hall, living room, kitchen and two bedrooms and a bathroom. In the attic two additional rooms and a toilet was designed. In total, the house have five comfortable rooms. On the ground floor next to the atrium with wardrobes is a utility room - boiler room. The gas boiler can also be easily replaced with solid fuel. Frog 2 is distinguished by a very nice shapely hall with representative stairs. Beautiful, wooden stairs diversify the interior. Frog 2 is an excellent choice for reasonable investors. Simple construction is very easy and inexpensive to build, and thanks to the good isolation and energy efficient materials and technology will allow for lowering cost of the subsequent exploitation. We have a basic version - without the attic, or the version with stairs and attic to adapt, as well as a mirror version of this house plan.
