	Air conditioning package	80
	Fencing projects	140
	Septic tanks sealed package	bezpł.

Sophia 2 is a variant version of the popular "Sophie" house plan. Simple, single-family house has been enhanced with additional attic for possible later adaptation. The house has possibly the simplest solid - is built on a square with sides 9.5 meters, covered by a gable roof. This construction is inexpensive in build. Compact solid of house include a functional interior. Due to the good ratio of surface external partitions to cubic volume, the house is warm and easily may be energy efficient. The interior of the house: on the ground floor provides a living area with living room, kitchen, hall, and three bedrooms with private bathrooms. Additionally vestibule, boiler room and toilet. The attic above the ground floor can be adapt into two additional rooms. Stairs - thanks to the wooden ceiling structure - can be easily integrate to interior.
