	Septic tanks sealed package	bezpł.

Ladybug 2 house plan is a variant version of popular house plan Ladybug. It is a small one-story detached house for the family of three - four people, covered by a gable roof with an attic to adapt. The house has a simple form and construction. It is easy to build and cheap to future exploitation. The house has a simple form and construction. It is easy to build and cheap to future exploitation. Thanks to the very good thermal insulation and modern installations, Ladybug is more energy efficient building. External appearance is a combination of modernity with traditional form. Modern finishing materials and architectural details connect with the traditional form of one-story house on a rectangular plan, with a gable roof. Front and garden facades have been varied by roofed arcades, and wood wall Elevations. The original roof covered with a sheet, you can be easily replaced by tiles or metal roofing tiles. The ground floor of the house consists of a living area with lounge, kitchen, hall and two bedrooms with a bathroom. Next to the porch is a gas boiler, which can be easily changed to boiler room with solid fuel stove. Despite its small area the house has a spacious and comfortable interior. Ladybug house plan is a year-round house, it can also be used as a holiday home. The simple and easy construction will save you on construction costs. Ladybug house plan is certainly a reasonable proposition for the thinking customer.
