	Boiler for solid fuel package	80
	Air conditioning package	80
	Fencing projects	140
	Septic tanks sealed package	bezpł.

Adventure 2 house plan is a charming house for a family of four-five-people, it is one-storey house with attic having a compact rectangular block covered with a gable roof. Simple elegance of the house and its functionality go together with energy efficiency and modernity. Shape of the house, its proportions immediately recall the image of "little white house" such a house with a chimney from children's imagination. Building a house is a great adventure. Proportional symmetrical body fit into any environment. Modern building materials and colors add elegance to the house. Interior of the house plan accommodates five bedrooms, two bathrooms and a separate boiler room. On the ground floor in this version we have a big living space of connected living room, hall and kitchen, and an extra room. In the attic there are three bedrooms with a private bathroom. The interior is easy to arrange and functional. Construction is very simple and clear and will be easy and inexpensive in building. Thanks to very good isolation of walls, floors and roof, the house is energy efficient. Is very easy to adapt to the NF40 standard. Surface of house allows to qualify the project MDM program requirements.
