	Fencing projects	140
	Septic tanks sealed package	bezpł.

Emerald 5 is a variant version of house with series of Emerald. This is the storeyed, detached house, with a garage partially built into the body, designed for a family of 4 -5 people. House is modern, but does not have aggressive architecture. Body of the building is compact and covered with an envelope roof. Thanks to that, house is both easy and inexpensive in construction and subsequent maintenance. Ground floor is an open living area with a living room, hall, dining room and open kitchen. Together rooms form a large common space. In addition, on the ground floor is provided room - study or a guest bedroom, bathroom, and large garage and boiler room. Near the kitchen is a small pantry. On the first floor we have three nice bedrooms (master bedroom with dressing room), and a very nice bathroom. There is also an additional room that can serve as a room or a home office or laundry - dressing room. Over the floor we still have quite large attic - storage. Emerald 5 is a comfortable, convenient house. It's got everything you need from a real house. The modern appearance of the house, colors and materials create a coherent whole with a spacious interior. House is energy efficient.
