	Septic tanks sealed package	bezpł.

Titan 2 B house plan is a new version of the project Titan 2 - with a fewer number of balcony windows on the ground and first floor. Titan 2B storey building, designed for a family of 5-7 people. The house is suitable for investors who want to squeeze up a large number of rooms with a small space. In order to maximize the use of interior we decide to resigned from garage. House is as simple and practical. On the ground floor we have a living room, kitchen with dining area, extra size room (e.g. for seniors), and a bathroom and utility room. On the first floor we have four full-size rooms, a large wardrobe and a very nice bathroom. And everything on 170 meters of surface. Body of the house is simple, but composed into a nice modern architecture. Elevations were divided into horizontal stripes, visually lowering body. The house is suitable for a plot with a garden on the side - where we have a disadvantageous location of the of entry into the land in relation to the sun. The house is very well insulated and energy efficient. Thanks to the simple body it will be easy and inexpensive to build.
