	Water jacket package	70
	Boiler for solid fuel package	80
	Air conditioning package	80
	Fencing projects	140
	Septic tanks sealed package	bezpł.

Unique 3 house design is another proposal for a single-family house from the series of "Exceptional" houses. The house is a super comfortable, one-story suburban villa, designed for a family of 4-6 people, who appreciates the luxury of living on one floor, without running up the stairs. Great advantage is also an invaluable closeness to the surrounding garden. House was designed in a similar layout to the other Unique houses, with the difference that it is suitable for a narrower plot. The solid of the building was designed on the plan of the letter "T" is a bit narrower, but it goes deeper into the garden of the plot. The shape of the house is covered with a multi-slope gentle roof. The architecture refers to the style of American bungalows. The house has a modern look, nice architectural details. Large glazing opens the interior to the terraces and garden. A representative entrance with wide doors invites us to the come to the house. The interior is divided into a living area, which consists of: a beautiful living room, dining room, large kitchen with island and pantry, and a private part with four bedrooms and two bathrooms, and finally the economic part - garage house, with garage, boiler room and laundry. Parents' bedroom is a separate apartment with its own bathroom and dressing room. Unique 3 is a very spacious and comfortable house. Both the functional interior as well as the unpretentious exterior architecture of the house will make the residents of the house will really live in it "exceptionally" well. The project uses modern materials and energy-saving technologies. The building - contrary to appearances, is not complicated to build, and the cost of its subsequent operation will not be very high.
